

# Student Testimonials

## Experience

NABILA

"The cultural exchange experience was truly one of my favorite things I participated in this year. I always wanted to do something of the sort, but because of school and work, I can never find the time. So I am thankful that this was part of my schoolwork this semester. "

## Communication

ELIZEBATH

"The most satisfying thing about this project was being able to say that I was communicating with them (students in another country) in the first place—This communication was a cool thing to brag about to friends and one of the coolest things I've experienced while in college, so I appreciate that."

## Exposure

SAMANTHA

"I found it very interesting that we were able to communicate with people in a completely different country and gain education from it. It was a very cool experience and the first time that I have ever communicated with a Chinese resident."

## Knowledge

RAHEL

"From this experience/course, I have learned so many things that expand my knowledge and awareness, even about myself. I never knew we write our ideas and thoughts shaped by our culture But then it makes sense; our perspectives depend on what society has raised us. "

## Awareness

GRACIE

"This experience really made me realize how much I actually don't know anything about Chinese culture. It kind of opened the door for me to start learning more about the culture."
